

NEWS AND INFORMATION FROM YORK COUNTY

On Tuesday, March 17, Governor Ralph Northam announced new measures to combat the spread of COVID-19 including the avoidance of non-essential gatherings of 10 or more people, per federal guidelines. This does not apply to essential services such as grocery stores, pharmacies, medical facilities, airports, bus and train stations, and manufacturers.

We encourage you to follow the Governor's order and limit the number of individuals in popular gathering spots – restaurants, gyms – to no more than 10. We recognize the hardship this places on everyone – from business owners to employees to citizens – and applaud you for the creative steps you are taking to continue providing services to the community.

By working together and implementing social distancing today, we may reduce the incidence of this virus tomorrow.
